

27th October 2016 – Clay Modeling Competition

Clay Modeling is a great way to help children to develop imagination and spark creativity. It also helps to develop hand – eye coordination. Young minds can think new and big with play-dough.

Keeping this in mind Clay modeling competition was organized for Buds & Blooms students on 27th October 2016. They made their own beautiful sun, snake, shapes, flowers, swan etc and displayed them with pride. Students were very enthusiastic and participated actively and very well executed their talents.
